

Project Topic

Query processing and data extraction using word embedding technique and VSM

- ❖ Following submissions are done in classroom :
 - Github project link
 - Read_Me file
 - Project Report
- ❖ In the Github repository, 4 code files, final project presentation, final project report, readme file are submitted.
- ❖ Out of 4 code files :
 - 2 are baseline models file :
 - VSM model
 - BM25 model
 - 2 are finally proposed models file :
 - Word embedding using BagOfWords model.
 - Word embedding using Word2Vec model.
- ❖ In project report, following points are covered :
 - Abstract
 - Problem statement
 - Dataset
 - Literature review
 - Baseline model methodology
 - Baseline model evaluation
 - Finally proposed model methodology
 - Finally proposed model evaluation
 - Conclusion
 - References
